

Shreyash Dhage

Frontend Engineer | React | Next.js | TypeScript

Pune, India | 8999760729 | sdhage1502@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Summary

Frontend Engineer with **1+ year** of experience specialising in **Next.js (App Router)**, **React**, and **TypeScript**. Consistently achieved **95+ Lighthouse scores** in production and built automation pipelines that cut editorial workload by **70%**. Strong focus on **Server Components**, **SSR/ISR**, **Core Web Vitals**, and **accessible UI**.

Skills

Frontend: Next.js (App Router), React, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, shadcn/ui

State & Data: TanStack Query, React Hooks, Redux Toolkit, Context API, Firebase Firestore, REST APIs

Testing & Performance: Jest, React Testing Library, Lighthouse, Core Web Vitals, Lazy Loading, Code Splitting

Backend & Tools: Node.js, n8n, Git, Docker, Vercel, CI/CD, Postman

Core Concepts: Server-Side Rendering (SSR), Static Site Generation (SSG), Incremental Static Regeneration (ISR), Responsive Design, Accessibility, SEO

Experience

Next.js Developer Intern, Meru Technosoft Pvt. Ltd. — Remote

Nov 2025 – March 2026

- Built and scaled a high-performance web application using **Next.js** and **React**, implementing Server Components and ISR across **90+ pages**.
- Integrated **Payload CMS** with **REST APIs**, enabling dynamic content delivery and multi-site support for content teams to manage sites independently.
- Built end-to-end blog automation pipelines using custom **REST APIs** and **n8n**, reducing manual publishing time by **~70%** and saving approximately **12+ hours/week** in editorial effort.
- Optimized application performance using lazy loading, caching strategies, selective data fetching, and CSS/code splitting, achieving **90+ Lighthouse score** on mobile and **95+** on desktop.

Software Developer Intern, Hexadecimal Software Pvt. Ltd. — Remote

Sep 2024 – Apr 2025

- Developed reusable, scalable UI components using **React**, **TypeScript**, and **Tailwind CSS**, reducing average page load time by **25%** through code splitting and lazy loading.
- Helped build and streamline the company blog website using React, JavaScript, and Markdown, resolving deployment blockers and reducing content go-live friction for the editorial team.
- Diagnosed and resolved frontend performance issues using **Chrome DevTools**, increasing UX performance scores by **34%**.
- Translated Figma designs into accessible, production-ready UI components adhering to **WCAG** standards.

Projects

Decentralized Crowdfunding Platform (Dec 2024 – Feb 2025)

[Live](#) | [GitHub](#)

- Built a blockchain-integrated frontend using **Next.js**, **React**, and **Tailwind CSS**; added **Ethers.js** for **MetaMask** wallet support, improving load times by **40%** and supporting **100%** cross-device compatibility.
- Integrated **Firebase Firestore** as off-chain database for campaign storage and **Firebase Auth** for admin access control.
- Fixed cross-browser UI issues using **Chrome DevTools** and added **React Query** for server-state management – reduced compatibility bugs by **25%** and met WCAG accessibility standards.

Smart Weather Forecast App with AI Assistant (May 2025 – June 2025)

[Live](#) | [GitHub](#)

- Built a responsive AI-powered weather dashboard using **React**, **TypeScript**, and **Vite**; integrated **OpenWeatherMap REST APIs** via **React Query** – scored **95/100** on Lighthouse.
- Cut API response times by **35%** using **localStorage** caching and optimized **Axios** calls; validated correctness with **Jest** unit tests and **Postman** contract testing.
- Added AI-driven weather summaries and Q&A using the **OpenRouter** API and Meta LLaMA 3.3.

MySQL + Next.js Master Data Management System (April – May 2026)

[Live](#) | [GitHub](#)

- Developed a full-stack MDM application using **Next.js**, **React**, **TypeScript**, and **MySQL** with 13 database models and 17 REST API endpoints.
- Designed normalized schema with joins, aggregate queries, soft deletes, and audit logging across 5 master entity types (User, Product, Supplier, Inventory, Transaction).
- Implemented duplicate detection with fuzzy matching and confidence scoring, plus a match/merge workflow aligned with Informatica MDM concepts.
- Built responsive UI with role-based access (3 roles), JWT authentication, ETL CSV import with 7 cleansing rules, and server-side search, filtering, and pagination.

Education

Master of Computer Applications (MCA)

JSPM's Jayawant Institute of Management Studies, Pune

2023 – 2025

CGPA: 7.84

Bachelor of Computer Applications (BCA)

Vidhya Bharati Mahavidyalaya, Amravati

2020 – 2023

76.90%
